

Retaining Excellence

Keystone Fiberglass Pins

Size (all unit types): 12.7 x 133 mm \pm 10%

Short Beam Shear = 44 MPa, minimum

Keystone's patented pin system features high strength, pultruded fiberglass pins that provide a shear connector, geogrid proof positive holder, and alignment device all in one piece.

Keystone's patented pin system ensures a positive mechanical connection between structural wall units and geogrids. The pins are the critical difference where **Keystone** provides the safety and security of a positive mechanical connection between units and geogrids.
